# d) Restricted Share Units ("RSU") and Deferred Share Units ("DSU")

On June 22, 2022, the Company's shareholders approved a fixed 10% RSU/DSU compensation plan (the "RSU/DSU Plan"). The RSU/DSU Plan provides RSUs and DSUs for directors, key management personnel and consultants.

Each RSU/DSU entitles the holder to acquire one common share of Source Rock, or a cash payment equal to the equivalent value of one common share of Source Rock at the time of vesting, or a combination of both (in the sole discretion of the Company's Board of Directors). RSUs will be settled within 30 days of vesting. DSUs will be settled within 30 days of the holder no longer being an officer, director, employee or consultant of the Company. Because the Company's Board of Directors has the ability to settle the RSUs/DSUs through equity and have not stated nor have any history of settling the RSUs/DSUs in cash, the RSU/DSU Plan will be classified as equity settled. Compensation expense is recognized at the market value of the Company's common shares at the time of grant and recognized over the vesting period with a corresponding increase to contributed surplus. Upon vesting of the RSU/DSU, the amount previously recognized in contributed surplus is recorded as an increase to shareholders'

capital. The RSUs granted shall vest evenly over three years on the anniversary date of the grant and the DSUs granted shall vest after one year following the grant date.

RSUs and DSUs will be credited with dividend equivalents in the form of additional RSUs and DSUs, respectively, as of each dividend payment date in respect of which normal cash dividends are paid on common shares. Dividends are recognized as compensation expense at the market value on the record date at the time the dividend is paid. Dividend equivalents credited to a RSU/DSU holder's account shall vest in proportion to the RSUs and DSUs to which they relate.

A summary of the Company's outstanding RSUs as at June 30, 2023, and the changes for the current year, is:

# **10. FINANCIAL RISK MANAGEMENT**

# Financial instruments and risk management

The Company's activities expose it to a variety of financial risks: credit risk, liquidity risk and commodity risk. The Company's overall risk management program focuses on the unpredictability of financial markets and seeks to minimize potential adverse effects on the Company's financial performance.

# Fair values

The Company's financial instruments recognized on the statement of financial position consist of current assets and liabilities of cash and cash equivalents, trade and other receivables, and trade and other payables and dividends payable. The fair values of the Company's current financial assets and liabilities approximate their carrying values due to their short-term maturities.

# Credit risk

Credit risk arises when a failure by counter parties to discharge their obligations could reduce the amount of future cash inflows from financial assets on hand at the statement of financial position date. The Company manages its exposure to credit risk through standard credit granting procedures and short payment terms. The Company attempts to monitor the financial conditions of its royalty payors and the industry in which they operate. The carrying amounts of trade and other receivables and cash and cash equivalents represent the Company's maximum credit exposure.

# Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet financial obligations at the point at which they are due. The Company's operating cash requirements are continuously monitored by management. As factors impacting cash requirements change, liquidity risks may necessitate the need for the Company to raise capital by issuing equity or obtaining debt financing.

All of the Company's trade and other payables are due in less than one year.

# Commodity risk

Commodity price risk is the risk that the fair value of future cash flows will fluctuate with changes in commodity prices. Commodity prices for oil and natural gas are influenced by the relationship between the Canadian and U.S. dollar as well as macroeconomic events that dictate the levels of supply and demand. The Company does not hedge its commodity price risk.

# 11. CAPITAL MANAGEMENT

The Company's capital is comprised of cash and cash equivalents and shareholders' equity. The Board of Directors does not establish quantitative return on capital criteria for management but rather promotes a prudent, repeatable, scalable and sustainable corporate platform that minimizes operating costs, and aims to maximize returns to its shareholders through per share cash flow growth and ultimately payment of a sustainable and conservative dividend. The Company is not subject to any externally or internally imposed capital requirements as at June 30, 2023.
